

Deer & Deer Hunting June 2009

New Gear for 2009

The Second Layer Series from **Gamehide** is designed specifically to go over the base layer and under the outerwear. The special fleece fibers wick moisture and spread it throughout the fiber so the garments dry quickly. Meanwhile, the smooth finish allows outer

garments to slide on easily over the middle layer. Plus, Second Layer Series fabrics stretch and move for unmatched comfort. Contact Gamehide at (952) 895-8740 or www.gamehide.com.

The Apex from **CVA** is an interchangeable barrel rifle that can be quickly set up with a wide range of stainless steel, fluted, Bergara Barrels in 13 different calibers – including muzzleloader, centerfire, and rimfire. The APEX features CVA's patent-pending E-Z Open breeching mechanism, which is extremely simple to operate. The APEX's innovative trigger design provides an incredibly clean, crisp pull, and is adjustable from approximately 3 to 5 pounds. An ambidextrous synthetic stock sports a high comb and is equipped with rubberized grip panels and CVA's new CrushZone Ultra recoil pad. Contact CVA at (770) 449-4687 or www.cva.com.

Arctic Cat's 700 H1 EFI Mud Pro is built for the swamps. It features the new Performance Mud Chassis with a slightly taller seat, new handlebar design and competition springs and shocks tailored for the Mud Pro's taller Highlifter Outlaw MST tires. It also features an elevated Intake and Clutch snorkel to keep the CVT belt dry and cool. The engine is a powerful 695cc, SOHC, single-cylinder, liquid-cooled powerhouse. Contact Arctic Cat at (218) 681-8558 or www.arcticcat.com.

Excel Sights offers ArmorTech and ArmorTech HD bow sights with Armored Fiber Technology so the .010 or .019 fiber optic is completely protected in surgical steel tubing for strength and durability. Plus, True Center Vision provides a circular sight picture even when viewed slightly off-center. The sights also feature tool-less windage and elevation micro-adjustments and micro-adjustment for individual pins. Contact Excel Sights at (434) 929-2800 or www.excelights.com.

The Xforce GX from **PSE** features the GX Hybrid Cam System for an improved draw cycle, 80 percent let-off and an IBO speed of 352 fps. The cam system also allows modular draw length adjustment without a bow press, and assures straight and level nock travel at all draw lengths. The bow measures 32.5 inches axle-to-axle, weighs 4.1 pounds, and features a brace height of 6 inches. Contact PSE at (520) 884-9065 or www.pse-archery.com.

The **Ameristep Bone Collector Blind** features a carbon enhanced, scent blocking, laminated interior with a heavy-duty, hub-style design for durable and easy set-up and take down.

Cutting edge NS3 Micro-Tech fabric eliminates shine and all excess noise with its dull fleece finish. The exterior features a UV protected micro-fiber shell that will not fade in the sun. Contact Ameristep at (810) 686-4035 or www.ameristep.com.

The Capture IR digital trail camera from **Cuddeback** features the company's Super Simple Set-up program and Hair-Trigger system that is more than twice as fast as previous Cuddeback models. Plus, there is no nighttime flash to spook game. The camera takes 3 Megapixel color images by day and 1.3 Megapixel infrared images at night. Plus, the camera will take more than 2,000 images per set of batteries. Contact Cuddeback at (715) 762-2260 or www.cuddebackdigital.com.

Carbon Express' F-15 series broadheads feature dual, side-by-side cutting blades, producing six edges to create a wound opening that is much larger than single-blade broadheads. The F15 blades utilize 440 stainless steel for extreme durability, precision, straightness and sharpness. The F-15 is available in a one-piece fixed blade model, and the an expandable version. The 100-grain fixed blade model features a 1 1/8-inch cutting diameter. The 100 grain expandable features four parallel expandable blades with a cutting diameter of 1 3/8 inches. Both broadheads feature an aggressive cut-on-contact design. Contact Carbon Express at (800) 241-4833 or www.carbonexpressarrows.com.
