BEST COMPOUND BOW SIGHT

PathFinder

Hind Sight's unique PathFinder sight is fully adjustable for distance while the shooter is at full draw. It can be calibrated for any bow, with the exact ranges sighted in and marked on the distance wheel. Just adjust the range dial to a desired distance, and the front and back sights move together to keep your line of sight true at all times. The front sight features a single pin, while the rear crosshairs make it easy to centre on the front pin. *Hind Sight Products, (734) 878-2842; www.hindsightco.com*

BEST VALUE

Stinger

While the Stinger isn't marketed as a high-tech speed bow, it has some incredible features that make it easy to shoot with remarkable speed and accuracy—all for less than \$300. Measuring a compact 31½ inches axle to axle, this compound bow sports an efficient new single cam, vibration-free parallel limbs, an incredibly forgiving 7½-inch brace height and an amazing 304 fps IBO speed. It's the perfect bow for any hunter looking for great value. *PSE Archery, (520) 884-9065; www.pse-archery.com*

BEST ARROWS

Aramid KV

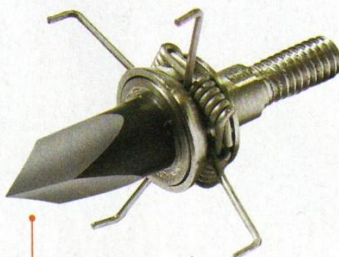

A layer of Kevlar, the same tough material used in bulletproof vests, has been incorporated into the Aramid KV carbon arrows, making them strong enough to survive a shot into a concrete block. The arrows also feature Built-in Weight Forward technology for excellent downrange accuracy, Bulldog Nock Collars for protection against splintering and Blazer Vanes for additional velocity. Touted as the strongest hunting shaft on the market, the Aramid KV comes with a Mossy Oak Break-Up camo finish. *Carbon Express, (810) 733-6360; www.carbonexpressarrows.com*

BEST NOCKS

Tracer S-Nock

Easton's lighted Tracer S-Nocks are incredible for allowing you to follow the flight path and point of impact of your arrows. The technology for these easy-to-install devices has been kicked up a notch with a magnet-activated light—when the arrow passes the magnet attached to your bow, the light in the nock turns on. And with 90 hours of battery life, you shouldn't have any problems finding your arrow. *Easton Archery, (801) 539-1400; www.eastonarchery.com*

BEST SMALL GAME HEAD

SG-X

If you've ever worried about your small game head being able to deliver lethal penetration, this new offering from Muzzy will give you peace of mind. The SG-X is a 100-grain head that sports four spring-loaded wire arms to help deliver energy and keep the arrow from disappearing after the shot. Muzzy's deadly TroCar replaceable tip is what makes this head cut, penetrate, shock and generate more damage than other small game heads. *Muzzy, (770) 387-9300; www.muzzy.com*
